

FusionSolar Troubleshooting Report

Date: 02-04-2026
Generated at: 02-04-2026 20:46:48
Prepared by: Service Performance Monitoring System

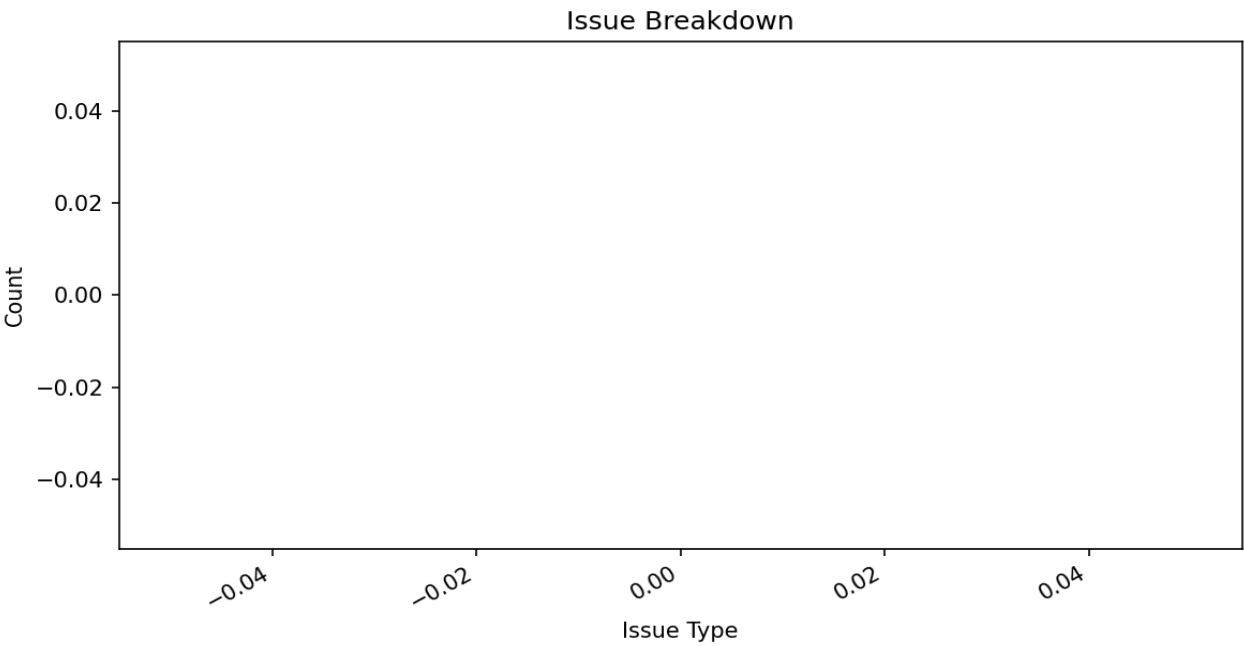

Executive Summary

Metric	Value
Total plants analysed	0
Total problem inverters	0
Total AI anomalies	0
Total alarm cases	0
Total high temperature	0
Total PV issues	0

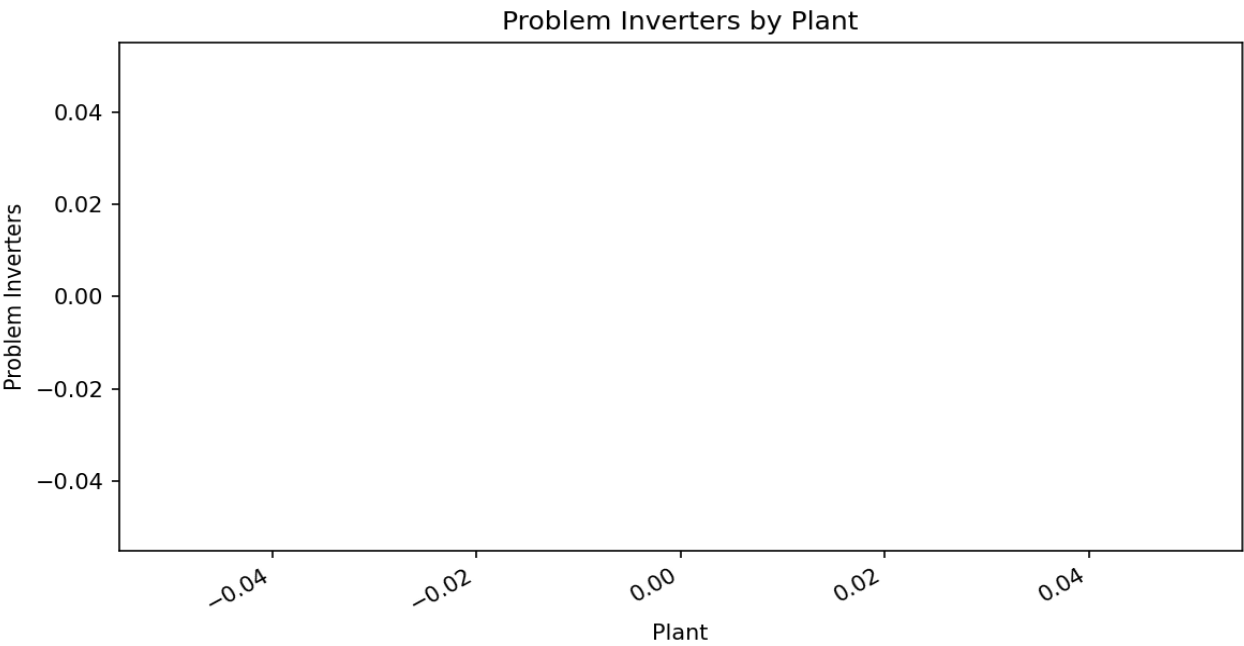

Issue Breakdown

Issue Type	Count
------------	-------

Issue Breakdown Chart

Problem Inverters by Plant

Plant Summary

Plant Name	Problem Inverters	Avg Plant PSH	AI Anomalies	Alarms	High Temp
------------	-------------------	---------------	--------------	--------	-----------

Conclusion

This report summarises inverter-level troubleshooting findings, plant PSH underperformance, AI anomaly results, alarms, and temperature/PV string indicators. Immediate follow-up is recommended for devices with severe PSH deviation, active alarms, PV string issues, or high temperature.
